YOUR PARTNER FOR INNOVATIVE

HEALTH CONCEPTS

Innovative and efficient products that set you and your company apart from the competition - with HF Concepts you have the right partner.

Our team is constantly researching the market for exciting innovations and works together with selected experts from the respective fields. Thus, we can guarantee to offer only profitable products that can be perfectly integrated into your interior.

YOUR EXPERTS IN

Biohacking and Longevity

In today's fast-paced world, where the boundaries of science and technology are constantly being redefined, we are witnessing a new revolution: that of biohacking and longevity products. HF Concepts is at the forefront of this and specializes in this innovative field.

BIOHACKING

The optimization of the human body

Biohacking is more than just a trend. It is a movement that aims to understand the biological processes of the human body and to use them in an optimal way. Through targeted interventions, nutrition, exercise, supplements and technological innovations, people are looking for ways to improve their health, performance and well-being.

LONGEVITY PRODUCTS

The quest for longevity

In parallel with biohacking, there is also the ongoing quest to extend the human lifespan and slow down the aging process. Longevity products are central to this effort.

They include a range of supplements, therapies and technologies that aim not only to extend life, but also to enhance the quality of life in the years gained.

Powercab® cryo chamber

Powercab® cryo chamber

The POWERCAB® Performance offers the simplest, safest and most cost-effective whole-body cryogenic solution on the entire market and is also a visual and technical highlight. It is equipped with the most advanced refrigeration technology currently available and reaches temperatures of up to -110 °C at the evaporator without the use of nitrogen.

During a whole body cryo application, the entire body is subjected to a thermal shock for 3 minutes, at a temperature of up to -110°C. This can bring several positive effects for body and mind.

- ✓ Up to -110°C
- ✓ 100% electric
- ✓ Modern & compact
- ✓ Highest efficiency

Powercab® cryo chamber

Unique, first class and 100% electric

The POWERCAB® makes it possible to achieve the best effects in only one chamber! Unlike comparable products, it no longer requires a multi-chamber system, which is associated with enormous costs and reconstruction measures.

Furthermore, it convinces with continuous cooling, adjustable ventilation speed, advanced software as well as comparatively low power consumption. The user-friendly software is full of possibilities and yet intuitive and easy to operate.

All this, coupled with exceptional cold storage technology ensures that the customer experiences the best possible cooling, as well as the thermal shock essential for the exceptional effects, as no cold is lost on entry.

- ✓ Low power consumption with an average of only 3.5 kWh.
- ✓ Increased cold storage due to patented air curtain
- ✓ Cooling room with space for up to 2 people
- ✓ New innovative sound system
- ✓ Individual interface to partner software possible
- ✓ 100% made in Germany
- ✓ Optical highlight with individual color settings
- ✓ Less wear and tear due to optimized production processes
- ✓ New POWERCAB® software with individual anamnesis & treatment time

Powercab® cryo chamber

APPLICATION AREAS

 **Health & Wellness**

 **Beauty & Anti-Aging**

 **Sports & Regeneration**

 **Diet support**

 **Pain application**

TECHNICAL FEATURES

Controllable via app, Automatic programs, Integrated digital anamnesis, Sound system via Bluetooth, LED light system, Automatic drying, Timer integrated in software, Heated glass, Adjustable ventilation, Remote support / remote maintenance

INSTALLATION

Our POWERCAB® can be installed in 2 variants

Version 1

Version 2

PRICES

POWERCAB® Storm available from 89.990€ net plus VAT

POWERCAB® Performance available from 99.990€ net plus VAT

POWERCAB® Performance Pro available from 149.990€ net plus VAT

New from June 2026: POWERCAB® One available for pre-order from €44.990€ net plus VAT

Costs for delivery, installation, training or special requests will be charged separately.

FINANCING

Of course, you can also conveniently finance the devices through our partners or a partner of your choice.

from

44.990€

plus VAT

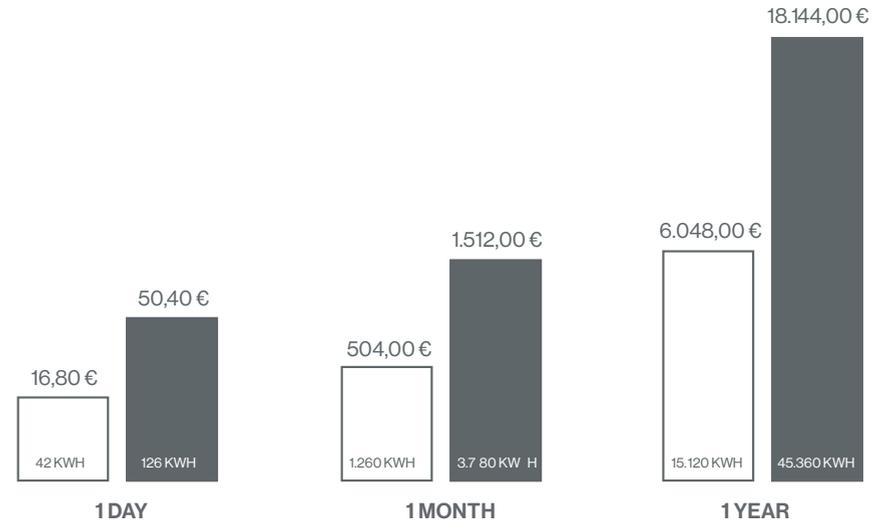

PROFITABILITY

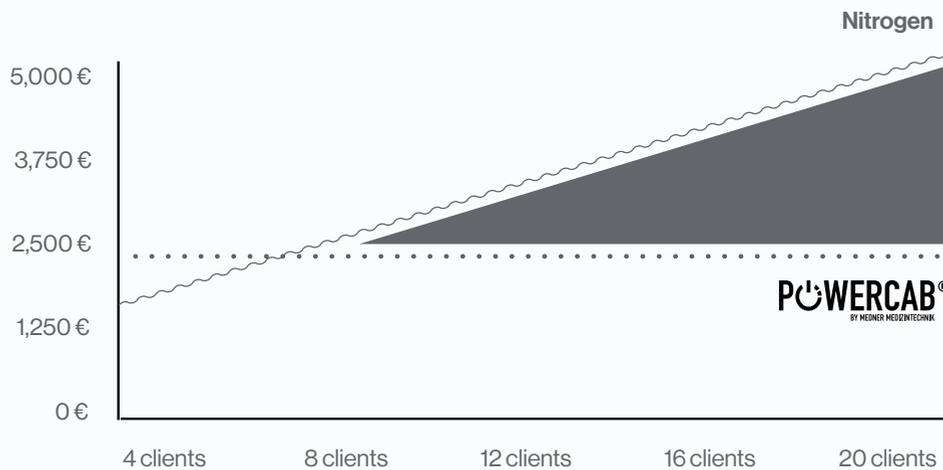

Comparison POWERCAB vs. conventional cryo chamber

The POWERCAB is the leader in energy efficiency, costing approximately 50% less electricity than comparable refrigeration chambers. In order to protect the environment, the POWERCAB also uses 100% natural refrigerants and thus achieves the lowest GWP score.

All calculations are based on cooling for 12 hours a day. The costs of the additionally required chiller are not considered in this calculation.

Tip: Electricity prices can be further reduced by joining a purchasing group.

Higher economic efficiency already with 8 applications per day.

POWERCAB vs. nitrogen cab

Compared to the nitrogen cab, the POWERCAB already offers greater cost-effectiveness with 8 applications per day. Even in view of the longer operating time and the higher leasing rate.

Calculation basis POWERCAB

Acquisition cost: 99.990 EURO
 Leasing rate: 1.750 EURO
 Operating costs: 500 EURO/month
 30 days per month

Calculation basis Nitrogen

Acquisition cost: 50.000 EURO
 Leasing rate: 760 EURO
 Operating costs: 8 EURO/application
 (incl. all costs)
 30 days per month

AVACURA®

AVACURA® is more than just an innovative device - it is a smart system for modern health concepts. Developed for medical practices, rehabilitation centers, hotels, biohacking studios and discerning private users, AVACURA® combines the latest findings from physiology, thermoregulation and biofeedback technology. The unique combination of heat, cold and negative pressure via the palms of the hands opens up new ways of regeneration, prevention and performance enhancement - without medication, without invasiveness, without effort.

- ✓ **Thermo-contrast technology** - Interaction of cold and heat for targeted activation of body functions
- ✓ **Intelligent biofeedback system** - Automatic adjustment of the application based on physiological reactions
- ✓ **Vacuum module to promote microcirculation** - For a significantly deeper and more efficient effect
- ✓ **Compact, low-maintenance design** - Ideal for everyday use - mobile, quiet and user-friendly

Your health in your hands

One device - many possibilities

AVACURA® was developed with the aim of making therapeutic effects measurable and at the same time offering maximum suitability for everyday use. The combination of targeted temperature stimulus, pressure change and real-time analysis via sensor technology enables applications that can be flexibly adapted to different health goals - whether for regeneration, performance enhancement or long-term health promotion.

Thermo module with precision control

The heart of AVACURA® is the precise control of heat and cold stimuli - precisely dosed and controlled via the palms of the hands. The individually adjustable intensity allows personalized applications for different target groups and indications.

Vacuum chamber with controlled negative pressure

The innovative pressure control generates a gentle negative pressure in the hand chamber. This biomechanical component improves blood circulation, optimizes the absorption of stimuli and makes the application noticeably more effective than conventional systems.

Integrated biofeedback system

AVACURA® uses an integrated HRV measurement to draw conclusions in real time about stress levels, the ability to regenerate and the balance of the autonomic nervous system. The application is then automatically adapted to the current physiological state - for precise, individualised stimulation and traceable progress towards resilience, relaxation and performance.

AVACURA®

AVACURA sets new standards

Scientifically sound, practically developed

AVACURA® is based on the latest findings from physiology, neuroregulation and lifestyle medicine - developed in close cooperation with experts from the fields of medicine, sports and health technology. The result: a system that works and is easy to use in everyday life.

Holistic effect through a targeted combination of stimuli

Heat, cold and negative pressure work synergistically and activate central regeneration processes in the body. The focus is not on one symptom, but on the natural regulation of the entire organism - effectively, profoundly and sustainably.

Flexible use - from medical practice to private spa

Whether in medical facilities, wellness concepts or for exclusive private use: AVACURA® blends seamlessly into any environment. Quiet, space-saving, design-oriented - and above all: intuitive to operate, without any specialist knowledge.

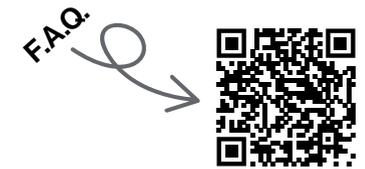

User-friendliness & design

AVACURA® is intuitive to operate, low-maintenance and aesthetically pleasing. The modern design blends seamlessly into any environment - whether a practice, studio or hotel. It requires no changing room or preparation and can be easily integrated into existing workflows.

hypoxbreath® IHHT training

hypoxbreath® IHHT training

hypoxbreath® is the latest IHHT training system from one of the world's leading manufacturers.

The hypoxbreath®'s intelligent BIO feedback system relies exclusively on proven control algorithms that have already been proven in various clinical tests and studies.

In addition, independent, double-redundant fail-safes guarantee maximum operational safety for your customer. Thus, oxygen saturation and O₂ concentration in the breathing air always remains within the preset range.

- ✓ Bio-Hacking
- ✓ App control
- ✓ Leading technology
- ✓ Highest quality standards
- ✓ Intelligent BIO Feedback System

Our best IHHT/IHT system at the best price

hypoxbreath® is the IHHT/IHT system for those who value quality, decades of experience in medical device manufacturing, technological advances and the best service.

Maximum operational reliability

Independent double redundant fail-safes guarantee maximum operational safety. Thus, oxygen saturation and O₂ concentration in the breathing air always remain within the preset range.

Intelligent BIO feedback system

An intelligent BIO-Feedback System relies exclusively on control algorithms that have already been proven in several long-term clinical tests and studies.

Fast and precise control response

A special use of components in a minimal space, ensures an exceptionally fast and precise control response during operation.

Measurement inaccuracies are avoided

Ambient-based measurement inaccuracies due to temperature increases during instrument operation are consistently avoided by technical innovations.

Flexible monitoring

The mobile operating unit allows more flexible monitoring of the user in practice operation. If you value low-radiation technology, we offer the terminal solution as an alternative.

- ✓ Made in Germany – Highest quality standards
- ✓ Hypertension deactivation function
- ✓ Training mode selectable: Hyperoxia or Normoxia
- ✓ Real-time measurement and clear display of bioparameters
- ✓ Full O₂ Range: Hypoxia/ Normoxia/ Hyperoxia (7.5% (med) / 9%-19%, / 21.9% / 22-34%)

HaloCab® Human Supercharger

HaloCab® combines several proven applications in one integrated system. Salt-rich air, targeted red light, ionised oxygen, harmonious frequencies and aroma diffusion work together within a closed cabin to create a controlled environment for relaxation, regeneration and sensory balance.

The system was developed to simultaneously address different sensory levels and enable a holistic user experience. HaloCab® is suitable for modern wellness, regeneration and longevity concepts and can be seamlessly integrated into existing studio or practice concepts.

- ✓ 5-in-1 system in an enclosed cabin
- ✓ Multisensory application
- ✓ Designed for professional environments
- ✓ Intuitive operating concept for professional use
- ✓ High-quality materials and modern, space-saving design

Longevity Innovation

The unique 5-in-1 Longevity System from HaloCab®

Red Light

Targeted red and near-infrared light. Supports cellular activity, blood circulation and regenerative processes through precise wavelength emission.

Salty air

Controlled, saline environment. Supports respiratory comfort, skin balance and a clear, calm breathing experience.

Ionised Oxygen

Oxygen-enriched airflow. Designed to support breathing comfort, energy levels and overall physiological balance.

Frequencies

Harmonious sound vibrations. Designed to promote relaxation, focus and balance of the nervous system.

Aroma

Gentle aroma diffusion. Complements the sensory experience and supports emotional balance and session immersion.

Well-thought-out system concept

HaloCab® was developed as an integrated total solution. Technology, design and application work together to provide a consistent, high-quality user experience in professional environments.

A Space for Regeneration and Balance

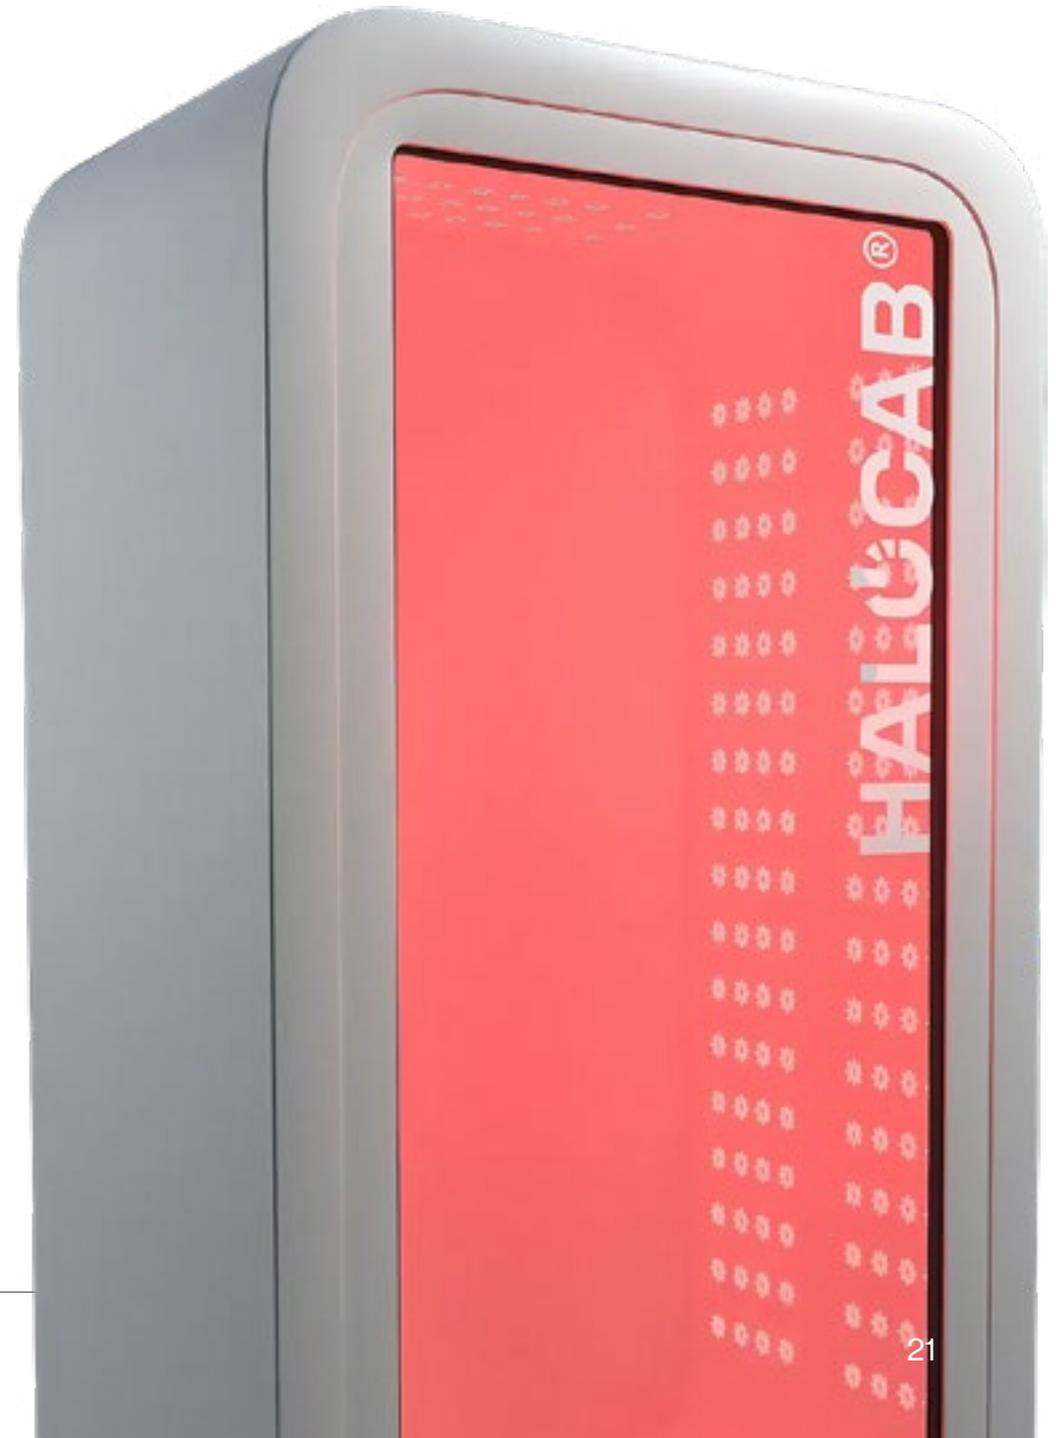

HaloCab® creates a protected space in which multiple sensory stimuli are specifically combined. The simultaneous application of different elements creates an immersive experience that appeals to the body and perception without overlaying individual stimuli.

The system is designed for regular use and can be flexibly integrated into wellness, health and longevity concepts. HaloCab® offers a structured, reproducible environment and supports modern approaches that focus on relaxation, regeneration and prevention.

Areas of Application

- ✓ Wellness and regeneration studios
- ✓ Longevity and biohacking concepts
- ✓ Spa and hotel treatments
- ✓ Health-oriented studio formats

HaloCab® combines technology, design and sensory quality into an integrated solution for holistic well-being.

TECHNICAL DETAILS

Dimensions: 1467 (L) x 1054 (W) x 2219 (H) mm

Weight: 400 kg

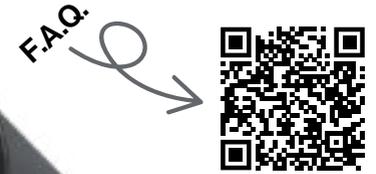

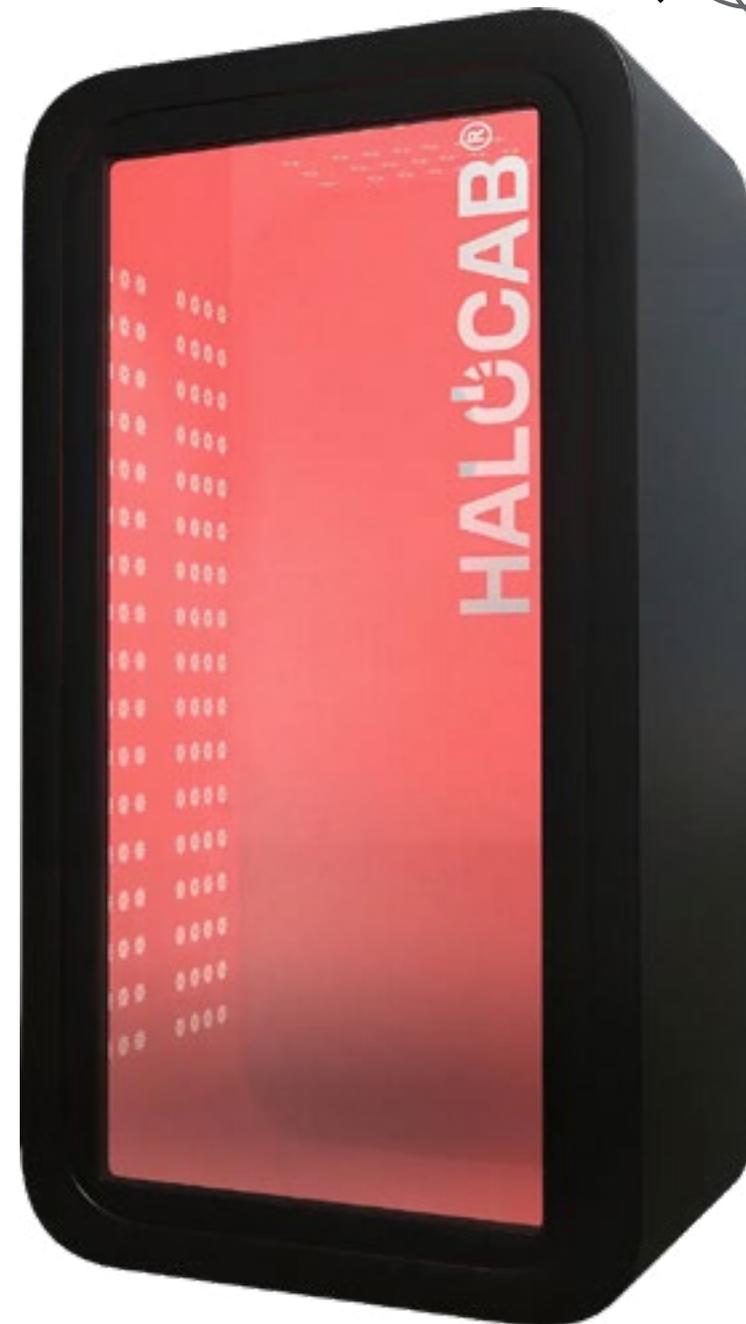

Power supply: 220–240 V, 50 Hz (Europe/Asia), 120 V, 60 Hz (USA), circuit breaker C16

Power consumption: max. 3.0 kW/h

Ambient conditions: Maximum temperature 24°C, ventilation or air conditioning may be required

Maximum humidity: 40%, dehumidification may be required

Installation requirements: Minimum space required 2000 x 2000 mm, rear access to technical components 50 cm

HaloRed™

HaloRed™

Introducing HaloRed™

HaloRed™ is the only product that combines both Salt Therapy and Red Light Therapy - all in one gorgeous unit! The synergy of the two modalities, when used simultaneously, is tremendous and backed by research and our patent!

Overview

- ✓ Combination therapy: salt and red light therapy in one device.
- ✓ Red light therapy: skin rejuvenation, inflammation reduction, immune strengthening, sleep improvement.
- ✓ Salt therapy: support for respiratory diseases, skin diseases, allergies, headaches.
- ✓ FDA approval: Red light devices approved as Class II medical devices.

HaloRed™ has a lens beam angle of 60 degrees, a 230V/13A power supply, all glass surfaces are made of 8 mm toughened safety glass and an integrated Bluetooth audio system.

Halotherapy - HaloGX™ Halogenerator

This revolutionary new halogenerator delivers salt therapy with the highest efficacy by creating the smallest sized salt particles. HaloRed™ has been optimized to include the Halotherapy Solutions HaloGX™ halogenerator.

Red Light Therapy - Red Light Panels

The powerful devices provide scientifically validated wavelengths of deep red (630-660 nm) and near infrared (830-850 nm) light from above, front and the sides. Red light is absorbed by the skin, boosting collagen production & aiding skin conditions. Near infrared penetrates deeper aiding muscle recovery, cellular renewal and joint pain. F.D.A. approved as Class II medical devices.

Benefits of red light therapy

- ✓ Improves respiratory health
- ✓ Skin rejuvenation / anti-ageing, promotes collagen formation, reduces wrinkles
- ✓ Reduces inflammation
- ✓ Promotes ATP production
- ✓ Supports regeneration
- ✓ Strengthens the immune system
- ✓ Improves sleep
- ✓ Reduces stress
- ✓ Improves brain function

Advantages of salt therapy

- ✓ Improvement of symptoms of asthma, bronchitis, allergies and other respiratory diseases
- ✓ Relief for rheumatic diseases, headaches and migraines
- ✓ Can help with skin conditions such as psoriasis, neurodermatitis, eczema, acne and fungal diseases
- ✓ Can improve general immune function
- ✓ Promotes relaxation and well-being, relieves sleep disorders, tiredness and stress

wellssystem® RedWave Pure

Photobiomodulation is already firmly established in US professional sports. wellssystem® RedWave Pure is the latest generation of full body application “Made in Germany”, combining red light and near infrared. The biopositive effects are proven by numerous studies and medically supervised application observations.

- ✓ Over 4.400 high-power LEDs
- ✓ Effective spectra: 630 nm + 660 nm + 850 nm
- ✓ Whole body application with red light & near infrared

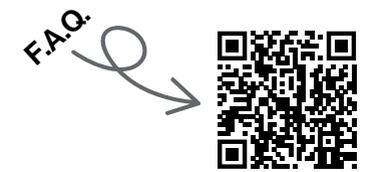

Photobiomodulation in sports & physiotherapy

For use in sports and physical therapy, red light is recommended in combination with deeper acting near-infrared to benefit from systemic deep effects. Photobiomodulation can increase performance, prevent muscular fatigue and accelerate recovery. The effectiveness of red light and near-infrared has been confirmed by over 1,000 scientific studies.

Light application before sports performance increases blood circulation and promotes the build-up of ATP in the mitochondria. After sports, the regeneration of muscles and connective tissue is promoted and metabolic activity is increased, which is shown, for example, by a faster breakdown of lactate. Before physiotherapeutic measures, the light working in depth, can accelerate the recovery of the musculoskeletal system.

- ✓ Preconditioning of muscles, bones, fascia and joints
- ✓ Increased performance through better blood circulation and more ATP
- ✓ Activation of fibroblasts to produce elastin and collagen
- ✓ Faster regeneration and support for massages and physiotherapy

NanoVi® cell regeneration application

The novelty on the European market

With the innovative cell regeneration application from NanoVi®, the body's own repair processes can be activated in a targeted manner.

NanoVi® supports the body in repairing itself and uses targeted, bio-identical signals to stimulate the formation of organised water, which is essential for protein folding and cell function, without chemicals or invasive procedures - purely via humidity and electromagnetic impulses. The application is pleasant, safe and highly effective against oxidative stress and energy deficiency.

NanoVi® technology is a state-of-the-art application that helps the body to meet its individual oxygen and energy requirements.

- ✓ Activates the body's own repair mechanisms
- ✓ More energy and mental clarity
- ✓ Gentle, non-invasive application
- ✓ Innovative technology with a scientific basis

How the cell regeneration application works

NanoVi® technology is used to support the process of protein folding in our cells. Proteins only function in a folded state. The problem: oxidative stress continuously damages folded proteins. This damage accumulates and the consequences are reduced performance, ageing and chronic diseases. In our cells, the surface (or zone) of proteins that come into contact with water must be in a certain state for protein folding to occur.

The NanoVi® device creates this specific state on the surface of the water droplets in an air stream. The droplet surfaces contain ordered water, also called Exclusion Zone (EZ), which you inhale when using the

device. NanoVi® supplements the naturally produced EZ water on the surface of the proteins to support protein folding and ultimately their function.

Thanks to the unique properties of the water in our body, the effects of the NanoVi® device are transmitted from the EZ water droplets through the mucus membranes to all proteins in all cells. Through this process, NanoVi® technology stimulates a biological process that occurs naturally in our cells to improve cellular activity in general.

- ✓ Regeneration & performance enhancement
- ✓ Anti-Aging & Wellness
- ✓ Burnout prevention & lack of energy
- ✓ Accompanying health measure
- ✓ Mental well-being
- ✓ Prevention of cell ageing

Oxyhelp HBOT

Oxyhelp enables the inhalation of pure oxygen in a pressurized chamber, increasing the oxygen content by many times the normal value, thus activating the natural self-healing powers of our body.

Under pressure conditions of 1.5 ATA, the lungs can absorb many times more oxygen. Under normal conditions, the oxygen content in our arteries is -100 mm Hg. By using the pressure chamber, the oxygen content in our arteries increases to -1400 mm Hg. An increase of 14 times the normal value. This allows the body to use the increased oxygen content for its benefit.

Hyperbaric oxygen therapy for

- ✓ Sports
- ✓ Anti-Aging
- ✓ Neurology
- ✓ Relaxation
- ✓ Rheumatology
- ✓ Complementary therapy
- ✓ Medical Rehabilitation
- ✓ Wounds and burns

OXYHELP PREMIUM CHAMBERS

OXYHELP chambers are designed and built according to very strict technological specifications to ensure high quality and safety. Moreover, Oxyhelp manages to combine ease of use with the highest quality, which makes it easy to control, even at home.

After reaching the set pressure, it's time to relax and enjoy a stable and calm environment with elevated pressure and pure oxygen.

The benefits of hyperbaric oxygen therapy

- ✓ Strengthens the immune system
- ✓ Heals injuries faster
- ✓ Reduces swelling and inflammation
- ✓ Promotes regeneration of injured tissue
- ✓ Supports the growth of new blood vessels
- ✓ Stimulates recovery of brain and nerve cells after injuries (hypoxic penumbra)
- ✓ Stimulates the production of endogenous stem cells
- ✓ Increases the body's ability to fight off infection
- ✓ Helps the body eliminate toxins
- ✓ Provides tissues with up to 14 times more oxygen
- ✓ Stimulates collagen production and accelerates the wound healing process

Healthier with every breath

Ideal for various facilities

- ✓ Sports Centers
- ✓ Beauty salons
- ✓ Chiropractors
- ✓ Wellness und Spa
- ✓ Gyms
- ✓ Orthopedic clinics
- ✓ Private use
- ✓ Holistic medical practices

Pelvipower™

Pelvipower™

The PelviPower™ system offers an innovative training method for strengthening the deep muscles of the pelvic floor. Using magnetic field technology, PelviPower™ provides effective and noticeable muscle contractions that can be performed in a comfortable and non-invasive session of 15-20 minutes. The areas of application are diverse and include improvements in incontinence, back pain, as well as specific training support for young mothers and athletes. This technology aims to improve the quality of life through a strengthened core muscle system and thus actively supports the health and well-being of users.

MADE
IN
GERMANY

Pelvipower™

A strong pelvic floor can provide support in many ways

The entire musculature of the pelvis and in the hips, buttocks and thighs are trained. A repetitive magnetic stimulates and relaxes the pelvic floor muscles on a neuromuscular basis.

The micro massage effect stimulates blood circulation throughout the the entire torso as well as in the lower lumbar vertebrae and the metabolism.

New: The innovative way to train the deep muscles in the center of the body

Easy: In everyday clothes, comfortably seated, 20 - 30 minutes per training session

Effective: Up to 25,000 contractions ensure a clearly noticeable effect - gentle, safe and effective

Train with your personal training card and our certified trainers will advise you and create your own personal training plan.

Please note: PelviPower™ pelvic floor training does not replace advice from a doctor or therapist in the event of a medical indication.

Gharieni binaural vibroacoustic systems

Gharieni

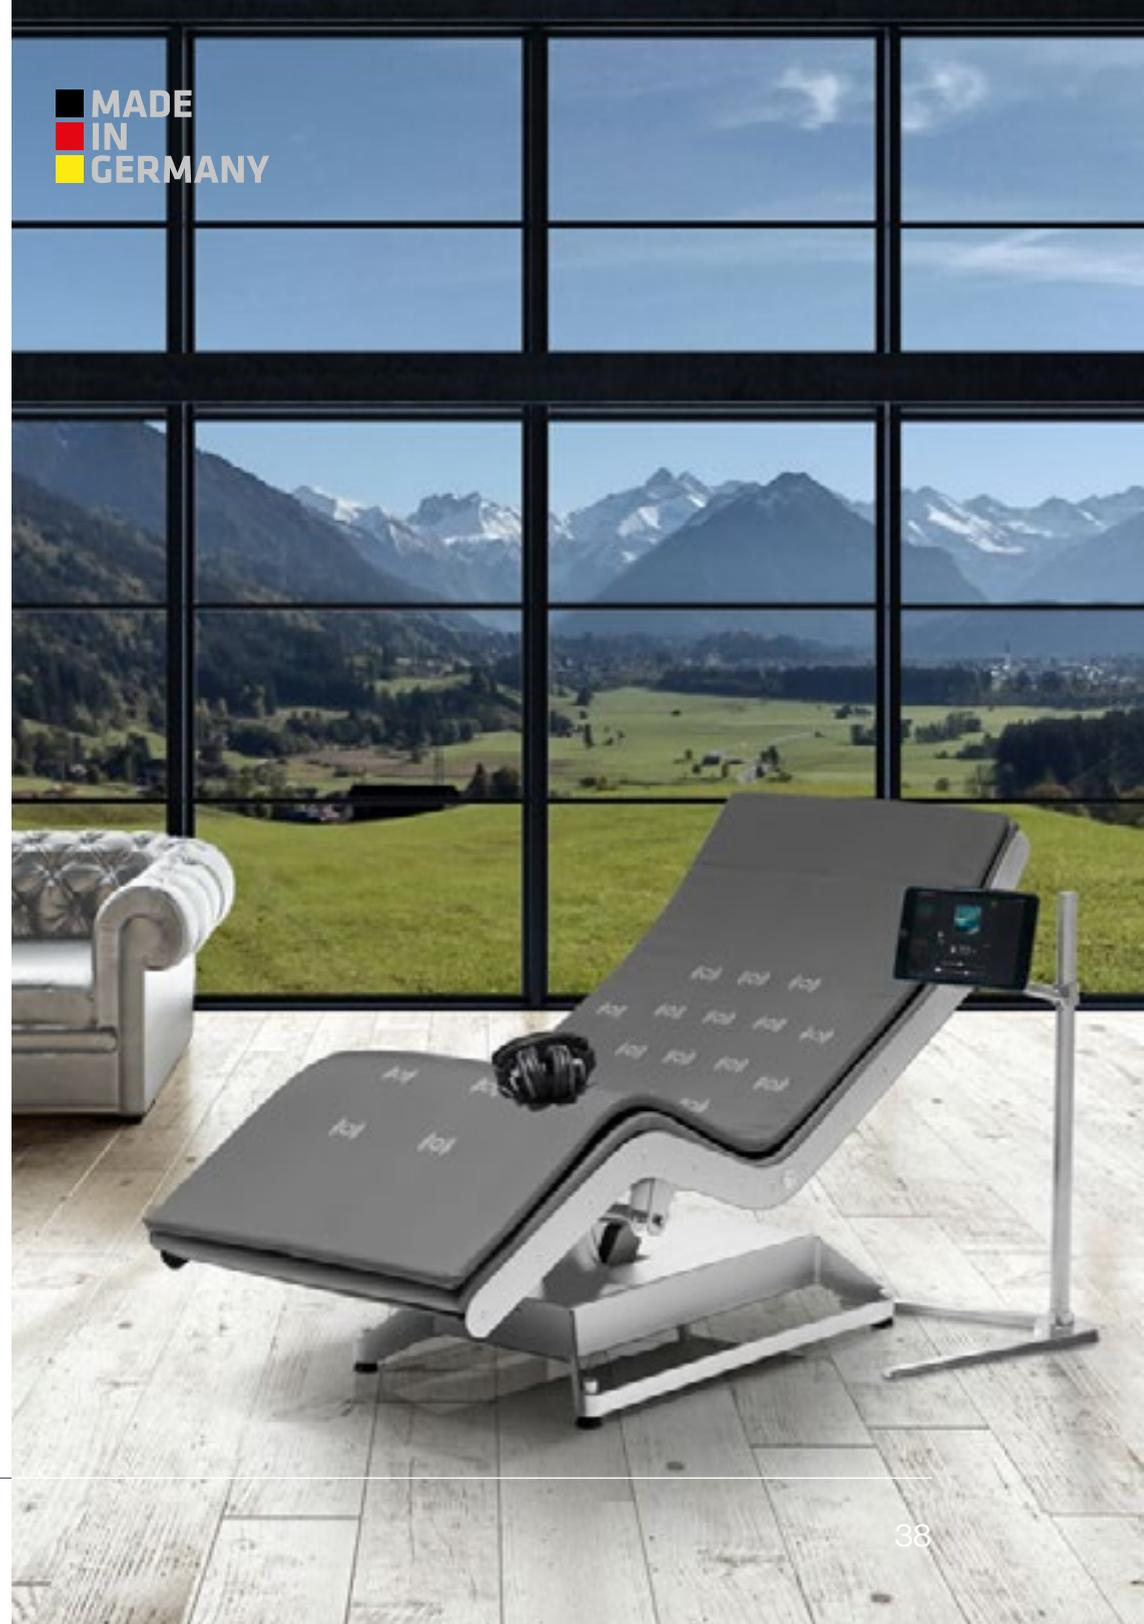

binaural vibroacoustic systems

Music and the sounds of nature transport you to another place: these luxurious loungers offers you the magic of music and pulsating haptic sensations that transport you to another dimension.

Choose carefully compiled experience programmes or your favourite music and embark on a journey like no other.

The combination of auditory and targeted haptic sensory experiences makes anyone in search of relaxation want to return again and again.

- ✓ Awaken your senses
- ✓ Unleash your creativity
- ✓ Reconnect with your body, mind and soul
- ✓ Rediscover the power of sound
- ✓ Experience deep relaxation and awaken your inner energy
- ✓ Take the time out you need from the worries of everyday life

Gharieni binaural vibroacoustic systems

An extraordinary experience

The Gharieni systems use natural vibration and binaural sound therapy to fully synchronise body and mind. It is used worldwide in the most exclusive wellness centres, clinical health facilities, behavioural change clinics, therapy and rehabilitation centres.

This combination of mental and physical stimulation is a powerful and effective tool for changing neural pathways and developing healthy behaviours. It has been medically proven that vibroacoustic therapy has positive effects on the state of mind and behaviour of people recovering from stress, anxiety, sleep disorders and addiction, who want to reduce stress and calm down better.

Areas of application of the systems

- ✓ Support in coping with chronic stress
- ✓ Deep relaxation for stressed people
- ✓ Reducing the symptoms of stress and anxiety

Gharieni RLX Satori offers a non-invasive method of creating consistent and positive therapeutic responses without drugs, supplements, mechanical aids or electrical stimulation. Gharieni RLX Satori utilises specially developed technology that releases specific sound frequencies that are projected into the body while synchronised binaural sound and music design, sometimes in combination with guided meditation, guides brainwave patterns into a state of relaxation, meditation, sleep and optimal brain focus.

- ✓ Improvement of mood
- ✓ Optimisation of sleep quality
- ✓ Scientifically proven

Gharieni binaural vibroacoustic systems

F.A.Q.

Zerobody Dry Floating

Zerobody Dry Floating is an innovative and patented system for the regeneration of body and mind. It is an effective and flexible method for Dry Floating therapy and is the result of extensive scientific research on the benefits of floating in water: dressed and without getting wet, the body floats on more than 400 liters of warm water.

- ✓ Pre-workout and after-workout station
- ✓ Power Nap (cognitive health)
- ✓ Visualization (focus, breath control)
- ✓ Float training (mental training, passive physical training, injury recovery)

Zerobody Dry Floating

Dry Float therapy uses the benefits of floating to re-energize the body and mind in a simple, versatile way that is suitable for everyone. Zerobody Dry Float is the only system in the world that takes advantage of gravity reduction. This technological innovation is at the service of regenerative well-being and has positive effects on: stress, muscle and joint pain, sleep, concentration, psycho-physical recovery.

- ✔ Muscle regeneration
- ✔ Reduction of heart rate variability
- ✔ Reduction of the stress level
- ✔ Decrease of the respiratory rhythm

Professional sports clubs and other customers from all over the world, rely on Zerobody - what are you waiting for?

LA Rams, San Francisco 49ers, Carolina Panthers, Cleveland Browns, NY Mets, Minnesota Vikings, San Francisco Giants, FISC NYC, University of Florida, FC Südtirol and many more use Zerobody daily - don't miss the unique effect of dry floating and bring Zerobody into your facility.

Zerobody Cryo

Zerobody Cryo is the revolution in the world of cryo applications. The innovation lies in the simplicity of use: The body is wrapped by a patented membrane without getting wet. It is a non-invasive, safe way of cold therapy at a temperature of 4-6°C. In addition, this solution allows easy access to the concept of cold therapy and provides the same benefits to the body as traditional cryotherapy or ice baths.

Zerobody Cryo also provides a pleasant cold effect and allows the user the comfort of dry floating.

Once connected, Zerobody Cryo cools the water to 4-6°C and is immediately ready for use. In addition, the unit scores with low energy consumption and sustainability.

Zerobody Cryo

The benefits of cold applications

Cold stimulates the immune system and metabolism by cooling the epidermis. The physiology of cold brings general well-being and specific physical and psychological benefits.

- ✓ rejuvenates the epidermis
- ✓ promotes fast and effective recovery during sports
- ✓ relieves muscle and joint pain
- ✓ stimulates the production of endorphins, thus lowering stress levels

Patented membrane

Patented membrane enables efficient heat exchange and provides the benefits of nitrogen cryotherapy and ice baths.

Touch screen display

By touch screen you choose the duration and start the session. The platform allows dry hovering and autonomous control.

Human Regenerator Jet

A worldwide unique product that uses plasma technology (CAP technology) to promote your health.

CAP technology has been used for decades in dermatology to regenerate skin cells from wounds, burns and tumors.

The plasma design used by the Human Regenerator Jet, penetrates deep into the tissue and therefore supports regenerative processes throughout the body.

A revolutionary procedure that will inspire you and your clients.

- ✓ gentle, pleasant, risk-free, purely physical application
- ✓ unique, cold, atmospheric plasma technology
- ✓ easy control and handling
- ✓ check-circle no program presets necessary
- ✓ check-circle highest quality and noblest materials

Human Regenerator Jet

Regenerative technology

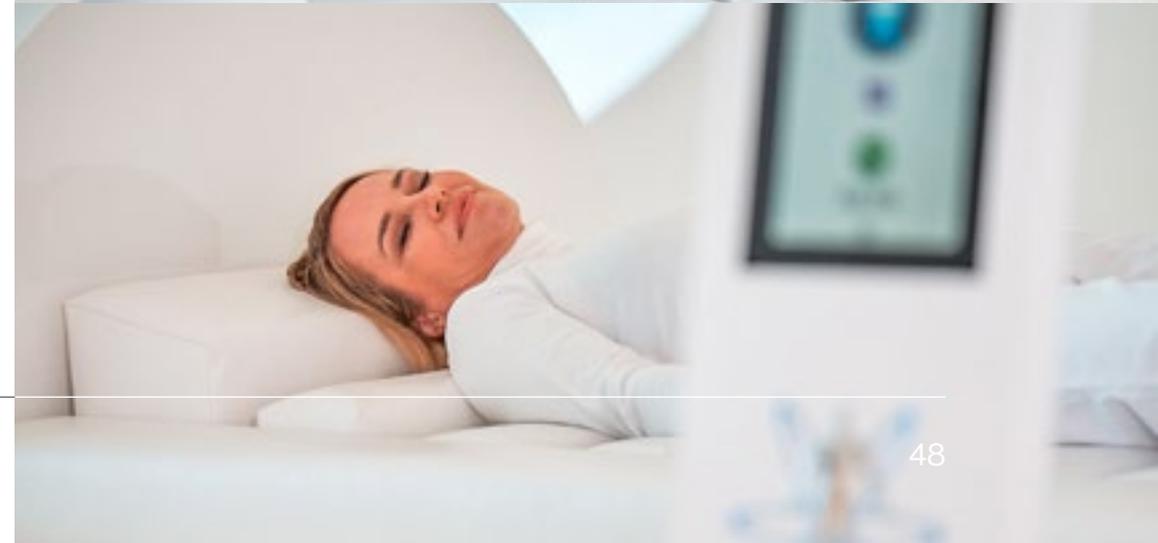

The Human Regenerator Jet is a worldwide unique physical system that effectively combats oxidative stress and thus counteracts aging and degeneration.

The unique plasma design uses static energy and anions to selectively supply the entire human body with countless electrons. This electron transfer is a direct, gentle and effective way to counteract the degenerative effects of oxidative stress.

In addition, the Human Regenerator Jet also provides the cells with static energy.

The user feels a pleasant static field during the session. Use the Human Regenerator Jet for prophylaxis or regeneration. Recharge “your batteries” and become one “with the elements”.

During the application the user is put into a meditative and relaxed state. The technology has also been used by clinics for many years with excellent results and without any known side effects, therapeutically and post-therapeutically.

Liposana3®

Liposana3®

Behind the Liposana 3 device technology lies know-how from more than 35 years of research and development. Here, Italian finesse is combined with Swiss precision to create a product that unites aesthetics, medicine and therapy in just one device.

Liposana 3 achieves a competitive edge through the innovative combination of patented technologies in conjunction with a holistic well-being concept. Thus, the Liposana 3 concept can be health-promoting, aesthetically beautifying and has a positive effect on the general well-being of your customers and patients.

This novel combination of device technology in conjunction with the holistic approach of the Liposana 3 strategy, achieves much stronger and more measurable effects than conventional bio-frequency systems.

- ✓ Measurable results
- ✓ Patented frequency technology
- ✓ Unique and highly effective technology
- ✓ Lasting immediate effect
- ✓ Intuitive, simple and self-explanatory operation
- ✓ Competence advantage through the innovative combination of patented technologies

The Liposana 3 device technology relies on 3 patented frequency patterns

Versatile application areas

Through the combination of ultrasound, neuromuscular stimulation and activation of the lymph, Liposana 3 offers rapid and sustainable application success in a wide range of specialties. Thanks to the patented technologies, Liposana convinces with strong and measurable effects and sets itself apart from conventional bio-frequency systems on the market.

The successful Liposana 3 strategy combines the Liposana 3 frequency technology with a holistic approach that stands for sustainable and measurable results in the areas of beauty, aesthetics and lifestyle.

Health promotion and prophylaxis

- ✓ Support of metabolism activation
- ✓ Application for muscle building and retraining
- ✓ Application for the activation of the lymphatic system
- ✓ Support for increase of local blood circulation

Health promotion and aesthetics

- ✓ Support of fat loss
- ✓ Promotion of Anti-aging
- ✓ Support of Figure shaping & circumference reduction
- ✓ Application for tissue tightening of face and body

Up to 5 technologies in one device

- ✓ **LLLT Laser** (Low Level Laser Therapie)
- ✓ **electroporation**
- ✓ **electrostimulation**
- ✓ **photobiomodulation**
- ✓ **ultrasound**

Lymphatic drainage

The lymphatic system transports excess water, proteins and waste products from the connective tissue back into the bloodstream. During transport, the lymph is cleaned, filtered and concentrated. Many immune reactions occur in the lymph node during this process. If the pathways become clogged, blocked, or damaged, fluids can accumulate in the connective tissue, leading to edema and fibrosis.

Once there is damage in the connective tissue (e.g. chronic inflammation, ulcers, hematomas, etc.), the lymphatic system must remove the

damaged cells, inflammatory products and toxins from the affected area. The faster this happens, the faster recovery occurs.

- ✓ Stimulate detoxification
- ✓ Strengthens connective tissue
- ✓ Regenerate faster
- ✓ Improve blood circulation
- ✓ Shape body and reduce girth

Lymphatic drainage

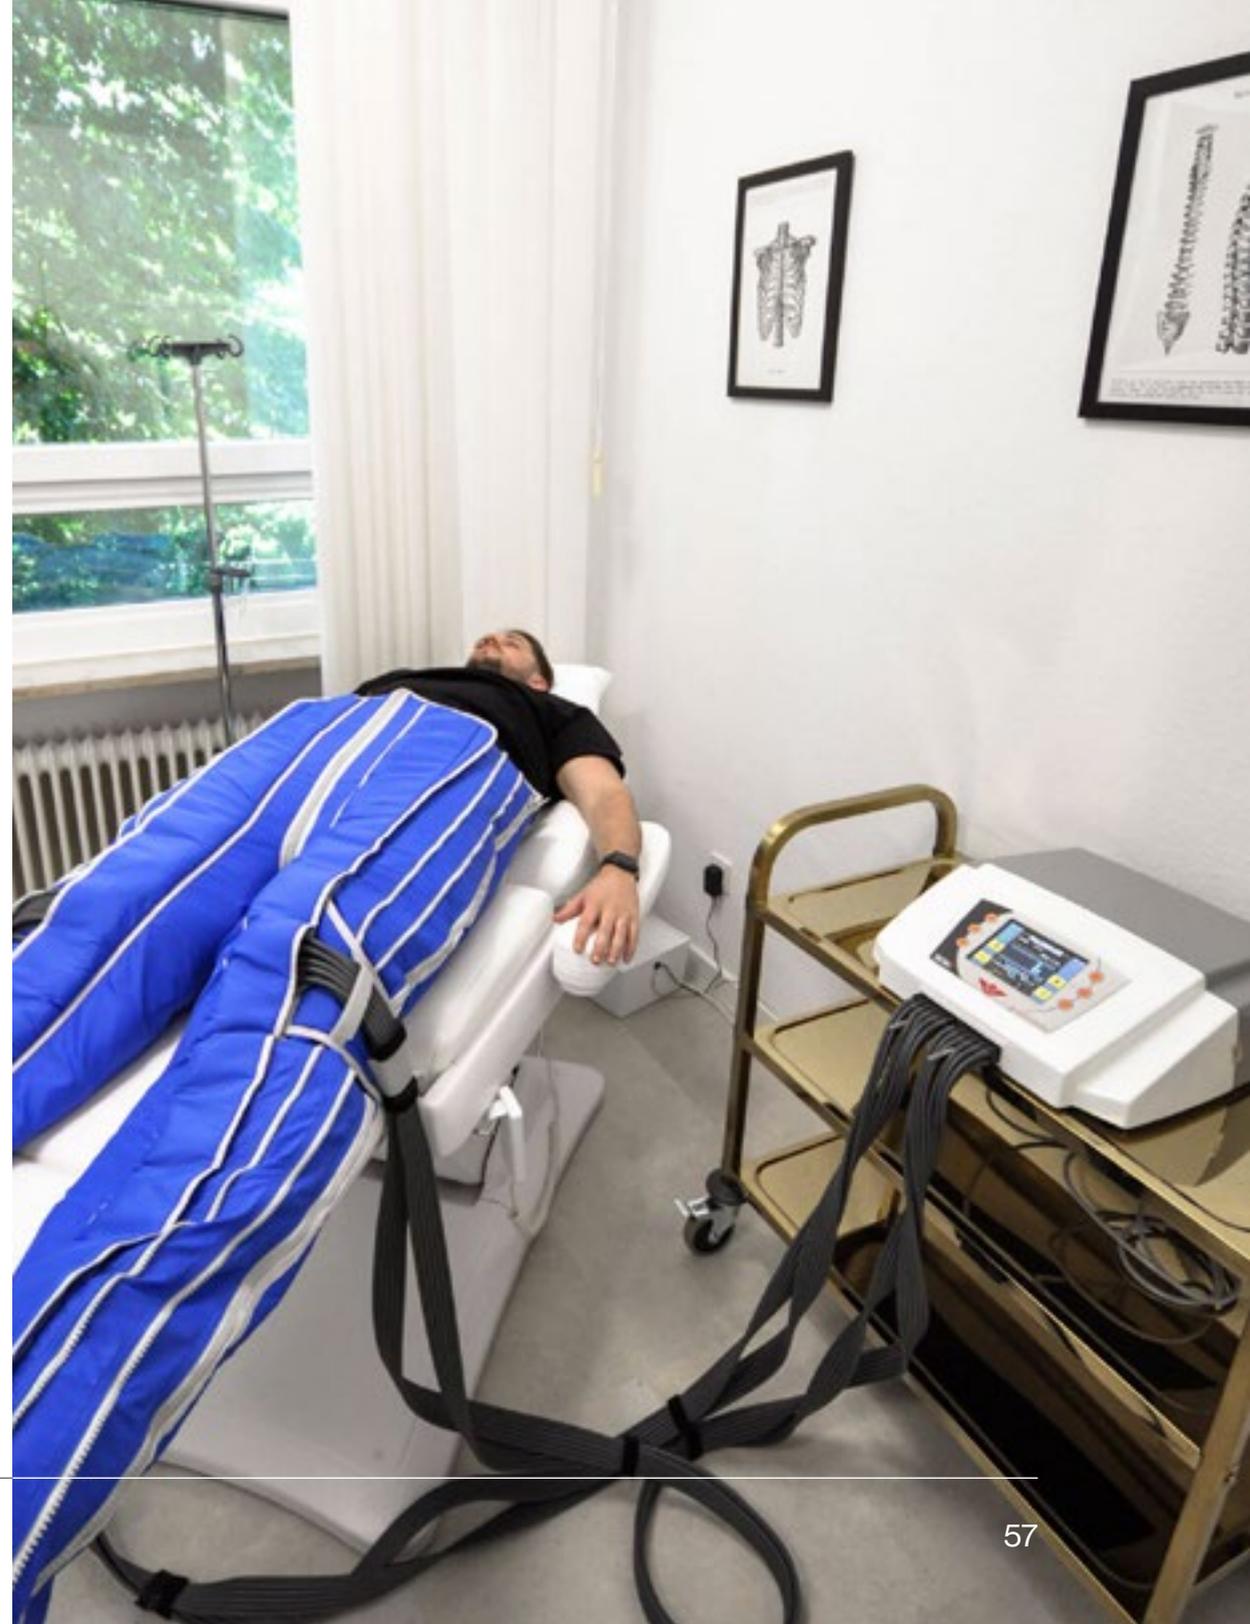

24 OVERLAPPING PRESSURE CHAMBERS

Lymphatic massager with 6 programs, developed according to the principle of manual lymphatic drainage by Dr. Vodder, including a special physiotherapy mode.

Dermio Care© Plus

Dermio Care© Plus is an innovative treatment system that combines dermionological technology with targeted color light application. In a controlled environment, the facial skin is surrounded by plasma enriched with negatively ionized oxygen while being treated simultaneously with selected light frequencies.

The system is inspired by natural processes that occur after thunderstorms or in the vicinity of waterfalls. Its aim is to create an environment that addresses both the skin and sensory perception. Dermio Care© Plus is suitable for professional use in cosmetics, wellness, and holistic skin care concepts.

- ✓ Combination of Dermionology® and color light therapy
- ✓ Treatment within a closed top-head unit
- ✓ Multisensory application for facial skin and sensory perception
- ✓ Developed for professional cosmetic concepts
- ✓ High-quality materials and modern, space-saving design

Two technologies. One integrated system.

Dermionology®

Ionized oxygen plasma is generated from ambient air and delivered in a targeted manner to the facial skin via the top head. The surface-active plasma can be easily absorbed by the skin and supports physiological processes at the epidermal and subcutaneous levels.

Color light application

Complementary color light with different wavelengths is used. The targeted light application affects both the skin and sensory perception, enhancing the dermionological treatment with a sensory and aesthetic dimension.

A new treatment experience for the skin

The interaction of Dermionology® and color light creates a calm, harmonious treatment environment that addresses both skin and perception. Dermio Care© Plus can be flexibly integrated into existing treatment workflows and is designed for regular professional use.

Blue light

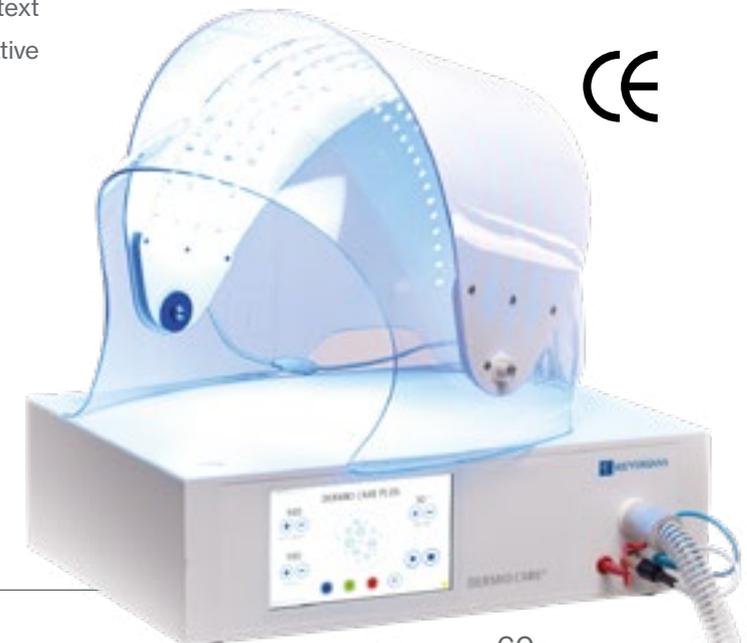

Used in cosmetic applications where a clarifying and balancing effect is desired.

Red light

Used in a cosmetic context to support regenerative skin processes.

Green light

Supports balancing processes and is often perceived as harmonizing.

Dermio Care© Plus

AREAS OF APPLICATION

- ✓ Cosmetic institutes and studios
- ✓ Wellness and spa applications
- ✓ Holistically oriented skin care concepts
- ✓ Complementing existing facial treatments

PRICES

Dermio Care© Plus available from 9.200€ net, plus statutory VAT.
Costs for delivery, installation, training, or special requests are charged separately.

Weber Medical Endolaser®

The Weber Medical Endolaser® is a laser system for professional medical applications that has been CE certified since 2005. The modular system enables both classic superficial laser treatments and minimally invasive applications, including intravascular blood irradiation and intra-articular laser therapy.

By using different wavelengths, biological processes can be specifically activated at the cellular level. In addition, the system can be used for photodynamic therapies and flexibly integrated into modern medical and regenerative treatment concepts.

- ✓ CE-certified medical system
- ✓ Modularly configurable and expandable
- ✓ Superficial and minimally invasive laser applications
- ✓ Use of multiple wavelengths with differentiated effects
- ✓ Suitable for regenerative and integrative therapy concepts

Biological effect at the cellular level

Low-level laser therapy with the Weber Medical Endolaser® acts directly on mitochondrial energy production and central regulatory mechanisms in the body. Targeted light application activates biochemical processes that have both local and systemic regenerative effects.

The focus is on stimulating mitochondrial function with a significant increase in ATP synthesis. At the same time, microcirculation and oxygen supply to the tissue are improved, inflammatory processes are modulated and pain-associated signalling pathways are positively influenced.

Overview of therapeutic effects

- ✓ Stimulation of mitochondrial function
- ✓ Activation and regulation of the immune system
- ✓ Improvement of microcirculation and reduction of blood viscosity
- ✓ Increased oxygen supply to tissues and cells
- ✓ Anti-inflammatory effects
- ✓ Effective pain relief
- ✓ Antimicrobial mechanisms of action
- ✓ Activation of stem cells and growth factors

Versatile applications in modern medicine

- ✓ Metabolic disorders
- ✓ Chronic exhaustion and fatigue
- ✓ Cardiovascular disorders
- ✓ Acute and chronic pain, including fibromyalgia
- ✓ Inflammatory disorders
- ✓ Infectious diseases
- ✓ Autoimmune disorders
- ✓ Degenerative and inflammatory joint disorders
- ✓ Slow ageing and longevity medicine

F.A.Q. 

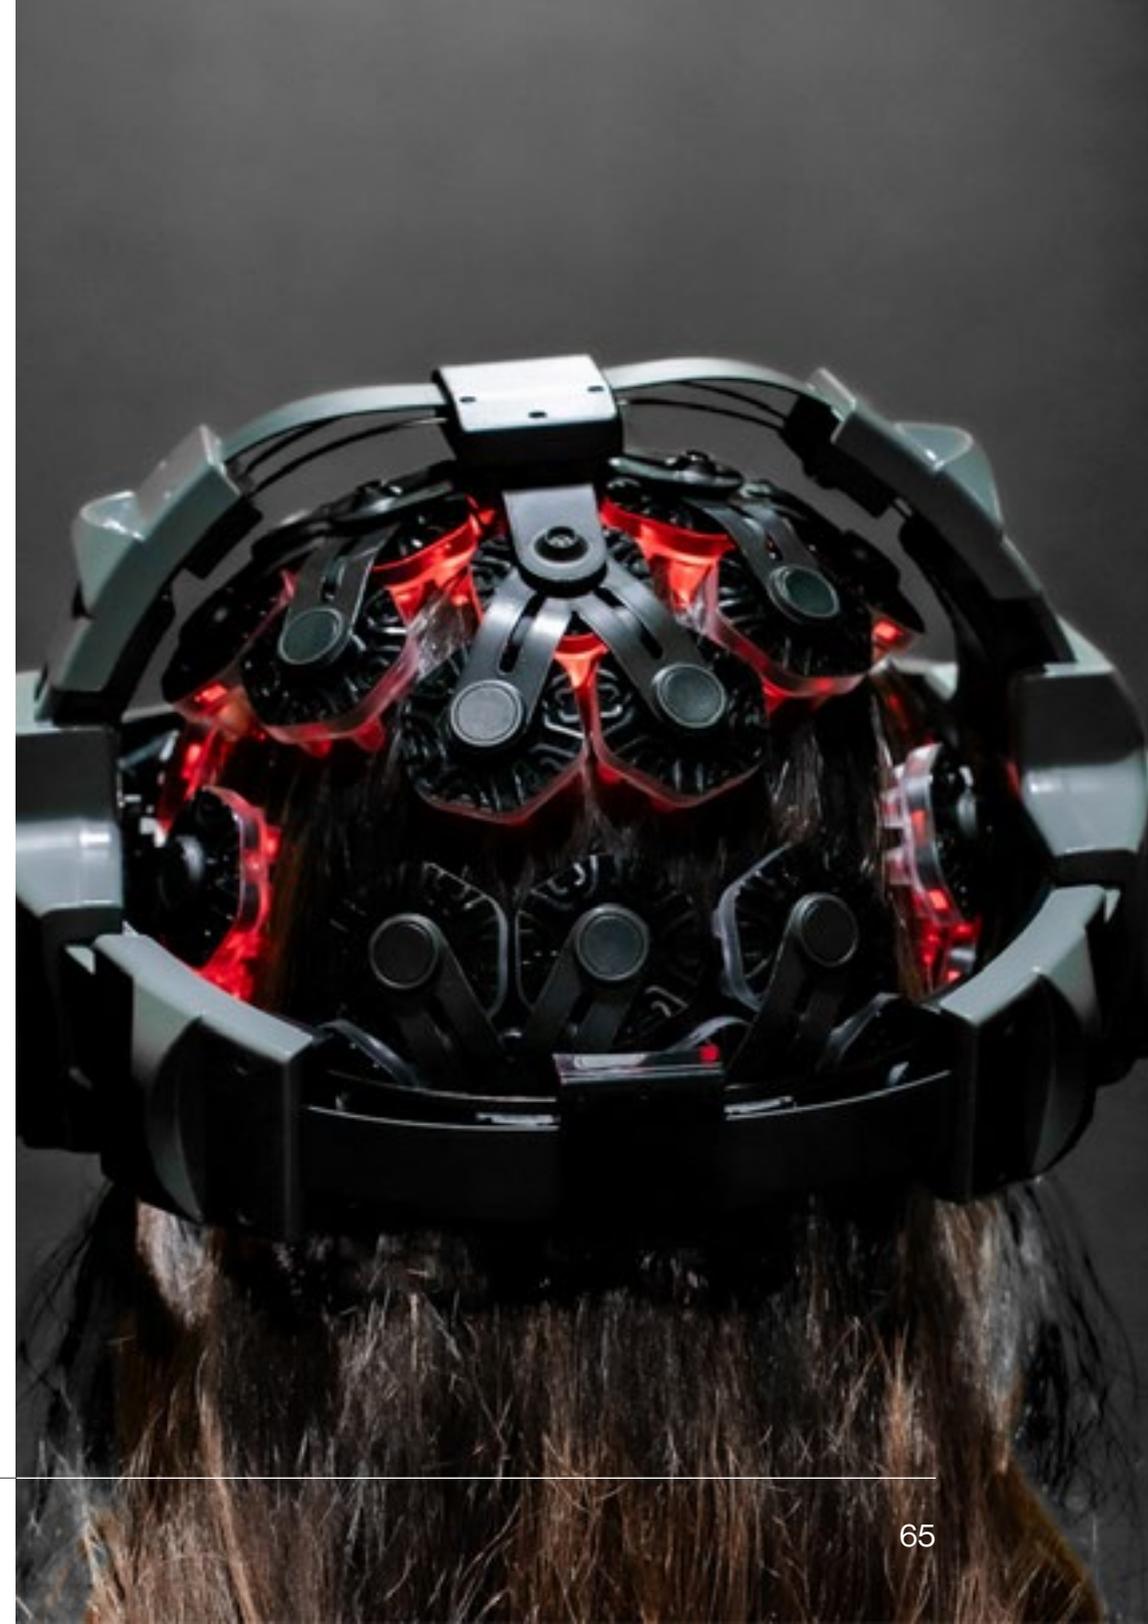

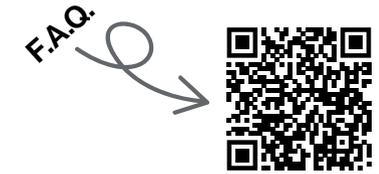

Weber Medical WeberBrain®

The WeberBrain® is a sophisticated laser system for transcranial photobiomodulation. Infrared light is applied to the scalp, penetrating the skull and being absorbed by the mitochondria in the cortical brain structures.

Targeted light absorption leads to increased ATP production, improves cerebral blood flow through the release of nitric oxide and increases oxygen supply to the brain. At the same time, metabolic waste products are removed more efficiently and neuroinflammatory processes are reduced. The altered neuronal environment promotes antioxidant effects, increased neuroplasticity and the activation of the body's own stem cells.

- ✓ Transcranial photobiomodulation with genuine laser technology
- ✓ Exclusively laser diodes, no LEDs
- ✓ Optimised penetration depth thanks to modern lens system
- ✓ Simultaneous activation of multiple therapeutic pathways
- ✓ Direct application to the scalp via funnel-shaped light outlets

USE CASES

- ✓ Cognitive impairments and memory problems
- ✓ Brain fog and mental exhaustion
- ✓ Neurodegenerative diseases such as Alzheimer's, dementia and Parkinson's
- ✓ Depression, stress and exhaustion
- ✓ Post-stroke rehabilitation
- ✓ Traumatic brain injuries and PTSD
- ✓ Neuroinflammatory processes
- ✓ Prevention of age-related cognitive degeneration

Scaneca

SCANECA offers a precise and fast 3D body analysis that visualizes posture, balance and body values in detail. Using the latest technology, SCANECA enables well-founded training and therapy solutions. During a short measurement process, SCANECA uses modern sensor technology to capture a highly precise 3D representation of the body surface. All results are clearly visualized, including posture, balance and health-related values such as BMI, body fat and waist-to-hip ratio.

- ✓ **3D avatar:** Virtual copy of the body for a comprehensive overview.
- ✓ **Precise posture detection:** Automatic determination of distances, angles and balance.
- ✓ **Body values:** Analysis of weight, fat percentage, BMI, FFMI and more.
- ✓ **Lightning-fast measurement:** Fully automatic, contactless and in just 30 seconds.
- ✓ **Progress visualization:** Motivation through measurable success.
- ✓ **Compact & portable:** Easy installation, ideal for physiotherapy, fitness studios and health facilities.

Scaneca body analysis

Precise results in record time

SCANECA is revolutionizing the way we perform body analyses. Within just 30 seconds, the system takes a precise, non-contact measurement of your body and visualizes the results in a detailed 3D avatar. Whether in a fitness studio, physiotherapy or health center - SCANECA is the ideal solution for modern and efficient analyses.

Precision at the touch of a button

SCANECA records data accurate to the millimeter and provides a comprehensive analysis of posture, balance and body measurements. This gives you precise results that are easy to understand and can be used immediately.

Unique visualization

SCANECA's 3D avatar provides an objective view of the body. Customers can view their body from every angle, identify problem areas and experience progress up close.

Time-efficient and contactless

SCANECA performs a fully automatic, contactless analysis in just 30 seconds. This speed and simplicity make the system unique for any application.

Compact innovation

Thanks to simple assembly and disassembly, SCANECA is portable and flexible in use. Developed and manufactured in Germany, it stands for quality and reliability at the highest level.

Massage Lounger

Premium massage chair: luxury and weightless massage pleasure

Offer your customers an unparalleled relaxation experience with our premium massage chairs. These chairs are the epitome of luxury, providing maximum comfort during treatment.

Why choose a premium massage chair?

- ✓ Unmatched comfort
- ✓ High-quality massage experience
- ✓ Innovative design and easy operation
- ✓ Adaptability
- ✓ Full-body air pressure massage

Massage Lounger

Find well-being

Pure Relaxation

Relieves tension and alleviates muscle discomfort after a long day.

High-quality Massage

With bionic massage rollers and 38 air cushions, the chair simulates a real SPA massage for the neck, shoulders, waist, back, legs, and feet. The rhythmic air pressure movements promote blood circulation and increase oxygen levels in the blood.

Innovative Design

A modern, easy-to-use piece of furniture.

Shiatsu Massage

Enjoy a professional Shiatsu massage at home.

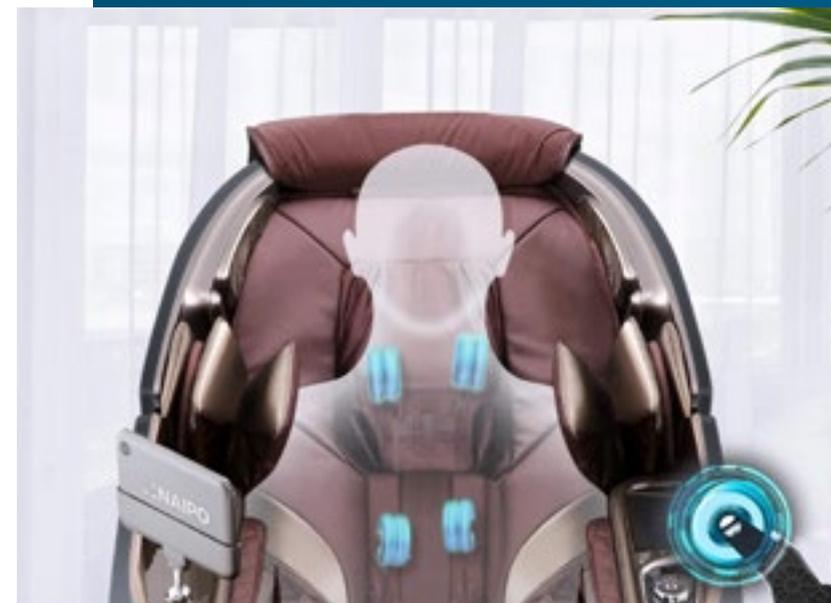

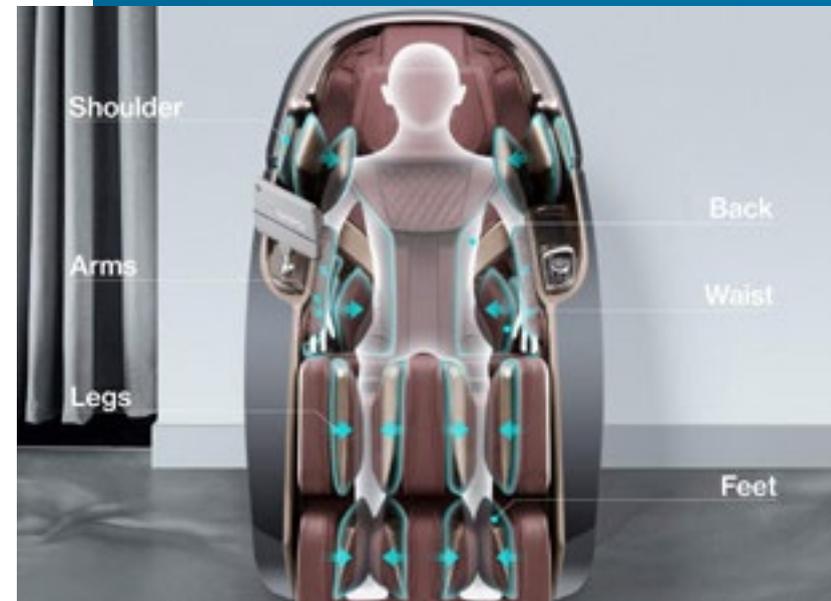

Ultimate full body massage experience

3D body scan & graphene heat

Adapts perfectly to your spine and provides warmth for your back and calves.

12 auto programs & individual adjustments

8" touchscreen control and quick console in the armrest. Choose from various techniques and programs for a personalized massage.

Supercharge Yourself

Exclusive access to premium longevity products

Supercharge Yourself is creating an innovative quality network for prevention, performance and holistic well-being. The platform combines clinically validated products, modern research and expertise from medicine, biohacking and biotechnology.

We are committed to providing evidence-based solutions for cellular energy, regeneration and healthy ageing – safe, tested and ready for immediate use. Supercharge Yourself supplies specialist practices, clinics, biohacking studios and medical spas with everything they need for modern longevity concepts.

We are setting new standards in prevention and health: from **NAD+** and methyl blue to exosomes, vitamin infusions and innovative antioxidants.

- ✔ NAD+ - to support cellular energy and vitality
- ✔ Vitamin infusions – individually combined micronutrients
- ✔ Exosomes – innovative approaches for research and development
- ✔ Methyl Blue - for specialised applications
- ✔ and other high-quality longevity technologies

Pioneers in longevity and health

Exclusive benefits for professionals

Doctors, therapists and health professionals who work with Supercharge Yourself benefit from:

Access to verified premium products

From NAD+ to methyl blue to vitamin infusions – all products are laboratory tested, clinically documented and tamper-proof packaged.

Continuing education

Regular updates on research, therapeutic approaches and product innovations – through online seminars, specialist workshops and networking events.

Transparent security

- ✓ Tamper-proof original seal
- ✓ Barcode for online verification
- ✓ Full traceability and protection against re-imports

Networking & exchange

Supercharge Yourself connects doctors, biohackers and therapists worldwide. This promotes practical knowledge transfer and better patient care.

More than just products – a holistic concept for your practice

- ✓ More than just products – a holistic concept for your facility
- ✓ Individual treatment plans & dosage regimens
- ✓ High availability & refrigerated express delivery
- ✓ Early access to new innovations

Heart Beat Analysis

Gain comprehensive insights into your physical and mental health in just a few minutes. The Heartbeat Analysis System (HBA) makes it possible to obtain valuable data by measuring and analyzing heart rate variability (HRV).

This data, based on decades of research, offers a detailed overview of your body's stress management. Our goal is to sustainably improve your health and performance by providing you with a user-friendly and effective analysis system.

All-in-One Package

A system developed by us, consisting of a pre-configured high-resolution chest strap and specially developed software.

Heart Rate Variability Measurement

Analysis of the regulation of the autonomic nervous system and the body's stress management through HRV measurement.

Stress Hormone Level Control

Accompanying prevention of psychological and physical health problems.

Heart Beat Analysis

HRV and Holistic Medicine

Our HRV is influenced by training, hormonal reactions, metabolic and cognitive processes, as well as stress and recovery. Regular analysis of the autonomic nervous system allows better individual regeneration, as targeted measures to improve health can be implemented. Poor HRV can indicate both physical and mental illnesses, making analysis an essential component of holistic medicine.

With the practical evaluation of HRV data, the HBA system is especially suitable for professional use. It stands out for its user-friendliness, making it easy for therapists to operate and for patients to understand. Individual measurements can also be directly compared to illustrate the course of therapy ideally. The evaluations can be sent to the patient or provided in printed form.

PRICES

Heartbeat analysis Android Version (incl. Samsung Galaxy TabA8, Polar H9 Heart Rate Monitor) 3.290€ net plus VAT.

Heartbeat analysis iPad iOS Version (incl. iPad 9th Generation, Polar H9 Heart Rate Monitor) 3.490€ net plus VAT.

Heartbeat analysis without Tablet 2.900€ net plus VAT.

FINANCING

Of course, you can also conveniently have the units financed by our partners or a partner of your choice.

Analysis and Performance

With our measurement system, meaningful data about your heart rate variability can be captured and analyzed. We use the results of decades of research to give you the best possible insight into your body's stress management. Our goal is to sustainably improve your health and performance by offering you a simple analysis system.

VoiceSupport.ai

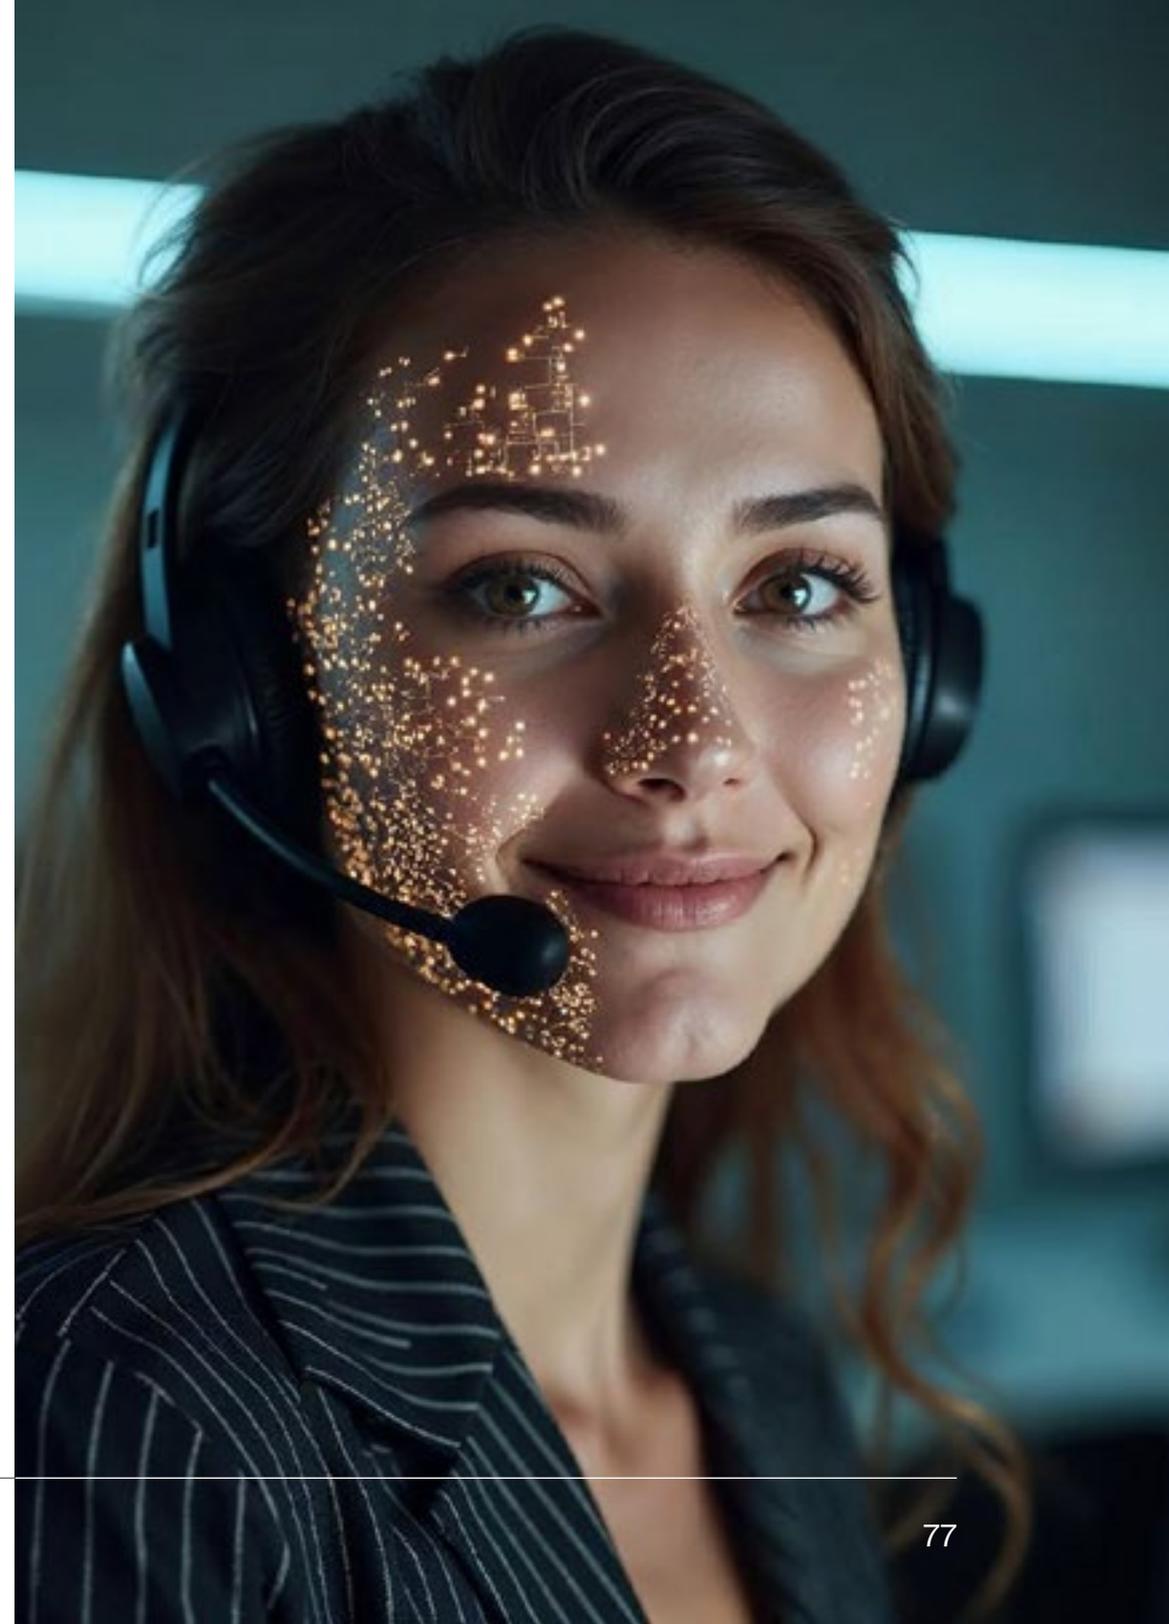

The smart AI solution for practices, studios & therapy facilities

More time for people - thanks to intelligent communication

VoiceSupport.ai automates your customer communication - efficiently, empathetically and available around the clock. Trust is essential, especially in the health and wellness sector.

VoiceSupport.ai ensures that your patients, clients and members feel well looked after at all times - even when your team is not available.

- ✔ **Available 24/7**
even in the evening, at weekends and on public holidays
- ✔ **Natural-sounding dialogues**
empathetic, professional & individual
- ✔ **Relief for your team**
AI takes over repetitive tasks
- ✔ **Fast integration**
with your practice software, CRM or booking tools
- ✔ **DSGVO-compliant**
maximum security for sensitive data
